Making Sustainability Real: From Eco STEM to Seed Libraries

A photograph of four small green seedlings growing in a row on dark soil. The seedlings are of increasing size from left to right, symbolizing growth and sustainability.

Alenka Melkić, Librarian
Coordinator of the Seed Library

Libraries as spaces of change

- community
- knowledge
- innovation
- sustainability

Seed Library

- lending of native seeds
- preservation of biodiversity
- a community that shares knowledge

Eco STEM in the library

books and reading

ecology

technology and AI

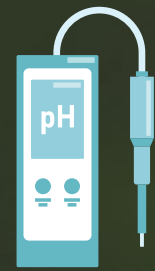

programming

AQ:bit workshop

- data for scientific research
- micro:bit technology
- air quality measurement

From seed to smart solutions

- environmental awareness
- digital competencies
- community collaboration
- lifelong learning

Libraries may lend books, but they can also cultivate much more—knowledge, community, and ideas for a sustainable future.

A top-down photograph showing a pair of hands holding a small green plant with many leaves. The plant is positioned over a pile of dark soil on a light-colored surface with a white leaf pattern. To the right, there is a black plastic nursery pot. The overall scene suggests a gardening or planting activity.

Thank you for your attention!
